Notice of opening Chennai branch of UBE Machinery India Private Limited

UBE Machinery India Private Limited (Headquarters: Gurgaon City, hereafter UMID), a wholly owned subsidiary that provides after-sales service for our products in India, has opened its second "Chennai Branch" in the country.

It was opened and started operations on October 1st (Thursday).

The Indian market has been temporarily stagnant due to the influence of the recent corona virus. However it is still attracting attention as an desirable market and is expected to grow in the future.

In December 2011, we established UMID in Gurgaon City (located in northern India) for customers who use our products in India. Since then we have provided equipment maintenance, machine performance improvement, and total engineering through our "Engineering & Manufacturing ability".

UMID will further enhance its support system in the southern and central regions of India by opening a new branch office in Chennai, which is the Gateway for South India.

Our goal is to further strengthen and aim to improve services that are closely linked to customers and the community.
